INCOME VERIFICATION MATCH (IVM)

TECHNICAL MANUAL

Version 2.0

November 1998

Department of Veterans Affairs
VIST**A** System Design and Development

Revision History

Date	Description	Author
10/9/01	Added OBX segment to ORU~Z07 HL7 Message Definition in Appendix A	Karen Stella
10/9/01	Updated OBX segment in ORF~Z11 and ORU~Z11 HL7 Message Definitions in Appendix A	Karen Stella
10/9/01	Updated OBX Segment Table in Appendix B to include NTR data descriptions	Karen Stella
10/9/01	Added VA0052 and VA0053 to Supported/User-Defined Tables section in Appendix B	Karen Stella
10/19/01	Added OBX segment to ORF~Z07 HL7 Message Definition in Appendix A	Karen Stella
10/19/01	Added ORU/ORF~Z10 HL7 Message Definitions in Appendix A	Karen Stella
10/19/01	Added sequences 24 – 26 to ZMT segment table definition in appendix B	Karen Stella
10/19/01	Added sequences to 22 – 23 to ZIC Segment Table Definition in Appendix B	Karen Stella
10/19/01	Added sequences 6 – 13 to ZCD Segment Table Definition in Appendix B	Karen Stella
10/19/01	Added ZIV to Segment Table Definitions in Appendix B	Karen Stella
10/30/01	Added ORU/ORF to HL7 Message Events Table in Appendix A	Karen Stella
12/7/01	Added ORF~Z06 to HL7 Message Definitions in Appendix A	Karen Stella
12/7/01	Updated ZMT Segment Table in Appendix A	Karen Stella
12/7/01	Added Table VA0051 to Supported/User-Defined Tables section in Appendix B	Karen Stella
12/7/01	Updated Table VA15 in Supported/User-Defined Tables section in Appendix B	Karen Stella
12/7/01	Updated Table VA0035 in Supported/User-Defined Tables section in Appendix B	Karen Stella
1/2/2002	Updated Enrollment Trigger Events section in Appendix A	Kevin Louck, Bob Shetler
1/10/02	Added ZMH Segment Table to Segment Table Definitions in Appendix B	Brian Morgan

Table of Contents

Introduction

Background

Public Law 101-508 permits the Department of Veterans Affairs (VA) to verify income data with the Internal Revenue Service (IRS) and Social Security Administration (SSA) for veterans receiving VA health care services whose eligibility for medical care is based on income. The income verification match process for Veterans Health Administration (VHA) medical facilities is centralized and performed at the Health Eligibility Center (HEC) in Atlanta, Georgia.

Functionality

IVM provides all of the functionality required to complete the eligibility verification process; electronically receive the revised VA Form 10-10F from the HEC; and automatically file the updated test in the **V***IST***A** Means Test module.

User Interactive Functions	Noninteractive Functions
• View/verify patient demographic, insurance, and SSN information received from SSA and IRS • Upload verified data • View billing/collection and Means Test activity • Configure, monitor, and purge the IVM system	• Exchange of data, on an ad hoc basis, between your facility and the HEC via electronic transmissions • Scheduled transmission to the HEC of all Means Tests meeting IVM criteria, as well as IVM-related billing and collections activity, via the *IVM Background Job* option *Note: Certain enrollment events, when they occur, are also sent to the HEC via the nightly background job.*

IVM V. 2.0 Release Notes

Integration

IVM V. 2.0 provides functionality that impacts Registration, Medical Care Cost Recovery (MCCR), and Information Resource Management (IRM) staff at your facility. It is highly integrated with the following packages:

Package Name	Integration
Patient Information Management System (PIMS)	• PIMS demographic, Means Test, enrollment, eligibility, and income information is sent to the HEC • Means Test and demographic information verified by the HEC is uploaded into PIMS files
Integrated Billing (IB)	• Patient insurance information is transmitted to the HEC • Means Test charges are created in IB for patients who become Category C when a verified Means Test from IVM is transmitted to the facility • Insurance information identified by IVM is uploaded into IB files • IB provides billing and collections information, for billings resulting from IVM activity, that is transmitted back to the HEC
Health Level 7 (HL7)	Provides the foundation for all communications between your facility and the HEC

Implementation and Maintenance

There are three parameters included with the IVM software. These parameters, which can be edited through the IVM Parameter Enter/Edit option, control whether notification messages are sent to the IVM MESSAGES mail group when SSN, demographic, and insurance information is received from the HEC. If no entry is made, the default action is to generate the messages. This option may be used to inactivate the messages.

The background option *IVM Background Job* must be queued to run daily. It is recommended that it is run during nonpeak hours. The option will transmit the following information to the HEC: Means Test, patient demographic, eligibility, income test, insurance, enrollment, and IVM-related billing and collections.

The mail group *IVM Transmissions* is used to route transmissions to the HEC. You should assure that the single remote user S.HL SERVER@IVM.VA.GOV is the only member of this group.

All IVM notifications generated by the system are sent to the *IVM Messages* mail group. At a minimum, both the IRM Support Specialist and the IVM systems coordinator should be added as members of this group.

No data in the IVM files should be edited. This data is added and maintained automatically by the module.

Routines

Per VHA Directive 10-93-142 regarding security of software that affects financial systems, most of the IVM routines may not be modified. The third line of routines that may not be modified is so noted. The IVM output routines in the IVMR* namespace are exempt from this requirement.

Callable Routines

The IVM package has no supported callable routines.

Routines to Map

It is recommended that the following routines be mapped.

IVML*
IVMR*
IVMU*

Routine List

Take the following steps to obtain a list of routines in the IVM V. 2.0 software:

1. Programmer Options Menu
2. Routine Tools Menu
3. First Line Routine Print Option
4. Routine Selector: IVM*

Files

Globals to Journal

The IVM global is the only global used with the IVM software and it should be journaled.

File List

Per VHA Directive 10-93-142 regarding security of software that affects financial systems, the IVM Data Dictionaries may not be modified. The file descriptions of these files are so noted.

File Number	File Name	Global
301.5	IVM PATIENT	^IVM(301.5
301.6	IVM TRANSMISSION LOG	^IVM(301.6
301.61	IVM BILLING TRANSMISSION	^IVM(301.61
301.63	IVM EXTRACT MANAGEMENT	^IVM(301.63
301.9	IVM SITE PARAMETER	^IVM(301.9
301.91*	IVM REASONS FOR NOT UPLOADING INSURANCE	^IVM(301.91
301.92*	IVM DEMOGRAPHIC UPLOAD FIELDS	^IVM(301.92
301.93*	IVM CASE CLOSURE REASON	^IVM(301.93

*File comes with data

Take the following steps to obtain information about the files and templates in the IVM software:

File Flow (Relationships between files)

1. VA FileMan Menu
2. Data Dictionary Utilities Menu
3. List File Attributes Option
4. Enter File # or range of File #s
5. Select Listing Format: Standard
6. You will see what files point to the selected file. To see what files the selected file points to, look for fields that say "POINTER TO".

Templates

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File: Print Template
                                  Sort Template
                                  Input Template
                                  List Template
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Exported Options

Take the following are the steps to obtain information about menus, exported protocols, exported options, and exported remote procedures relating to the IVM package.

Menu Diagram

1. Programmers Options
2. Menu Management Menu
3. Display Menus and Options Menu
4. Diagram Menus
5. Select User or Option Name: O.IVM MAIN MENU

Exported Protocols

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File: PROTOCOL
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Exported Options

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File: OPTION
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Exported Remote Procedures

1. VA FileMan Menu
2. Print File Entries Option
3. Output from what File: REMOTE PROCEDURE
4. Sort by: Name
5. Start with name: IVM
6. Within name, sort by: <RET>
7. First print field: Name

Archiving and Purging

Archiving

There are no archiving capabilities included with the IVM software.

Purging

The Purge IVM Transmissions option allows IRM to purge entries from the IVM TRANSMISSION LOG file (#301.6) which are associated with closed cases (entries in the IVM PATIENT file (#301.5)) from the previous Means Test year).

Package-wide Variables

There are no package-wide variables associated with the IVM software package.

SACC Exemptions/Non-Standard Code

There are no SACC Exemptions associated with the IVM software package.

External/Internal Relations

External Relations

The following **V**ISТ**A** package versions (or higher) MUST be installed PRIOR to loading this version of IVM.

Kernel	V. 7.1
VA FileMan	V. 20.0
PIMS	V. 5.3
Integrated Billing	V. 2.0
OERR	V. 2.5
HL7	V. 1.5

DBIA Agreements

Take the following steps to obtain database integration agreements for the IVM package.

Custodial Package	Subscriber Package
1. FORUM	1. Forum
2. DBA MENU	2. DBA MENU
3. Integration Agreement Menu Custodial Package Menu	3. Integration Agreement Menu
	4. Subscriber Package Menu
4. Active by Custodial Package Option	5. Print Active by Subscriber Package Option
5. Select Package Name: IVM	6. Start with subscriber package: IVM

Internal Relations

All of the IVM V. 2.0 package options have been designed to stand alone.

Security

Security Management

Public Law 101-508 permits the Department of Veterans Affairs (VA) to verify income data with the Internal Revenue Service (IRS) and Social Security Administration (SSA) for veterans receiving VA health care services whose eligibility for medical care is based on income. The IVM process for Veterans Health Administration (VHA) medical facilities is centralized and performed at the HEC in Atlanta, Georgia.

Per VHA Directive 10-93-142 regarding security of software that affects financial systems and central data bases, IVM routines may not be modified with the following exception: IVMR* - IVM Reports. In compliance with this same directive, the IVM Data Dictionaries may not be modified.

Security Keys

Take the following steps to obtain information about the security keys contained in the IVM software:

1. VA FileMan Menu
2. Print File Entries
3. Output From What File: Security Key
4. Sort By: Name
5. Start With Name: First// IVM
6. Go To Name: Last// IVMZ
7. Within Name, Sort By: <RET>
8. First Print Field: Name
9. Then Print Field: Description

VA FileMan Access Codes

The following is a list of recommended VA FileMan access codes for the files in the IVM software.

File Number	File Name	DD Access	RD Access	WR Access	DEL Access	LAYGO Access
301.5	IVM PATIENT	@		@	@	@
301.6	IVM TRANSMISSION LOG	@		@	@	@
301.61	IVM BILLING TRANSMISSION	@		@	@	@
301.63	IVM EXTRACT MANAGEMENT	@		@	@	@
301.9	IVM SITE PARAMETER	@		@	@	@
301.91	IVM REASONS FOR NOT UPLOADING INSURANCE	@		@	@	@
301.92	IVM DEMOGRAPHIC UPLOAD FIELDS	@		@	@	@
301.93	IVM CASE CLOSURE REASON	@		@	@	@

How to Generate On-line Documentation

This section describes some of the various methods by which users may secure IVM technical documentation. On-line technical documentation pertaining to the IVM software, in addition to that which is located in the help prompts, may be generated through utilization of several Kernel options, including those listed in this section. Refer to the **V**_IST_**A** Kernel Reference Manual for further information about other utilities which supply on-line technical documentation.

Xindex

This option analyzes the structure of a routine(s) to determine in part if the routine(s) adheres to **V**_IST_**A** Programming Standards. The XINDEX output may include the following components: compiled list of errors and warnings, routine listing, local variables, global variables, naked globals, label references, and external references. By running XINDEX for a specified set of routines, the user might discover any deviations from **V**_IST_**A** Programming Standards which exist in the selected routine(s) and see how routines interact with one another, that is, which routines call or are called by other routines.

To run XINDEX for the IVM package, specify the IVM namespace at the "routine(s) ?>" prompt. IVM initialization routines which reside in the UCI in which XINDEX is being run, as well as local routines found within the IVM namespace, should be omitted at the "routine(s)?>" prompt. To omit routines from selection, preface the namespace with a minus sign (-).

List File Attributes

This VA FileMan option allows the user to generate documentation pertaining to files and file structure. Using this option via the "Standard" format will yield the following data dictionary information for a specified file(s): file name and description, identifiers, cross-references, files pointed to by the file specified, files which point to the file specified, input templates, print templates, and sort templates. In addition, the following applicable data is supplied for each field in the file: field name, number, title, global location, description, help prompt, cross-reference(s), input transform, date last edited, and notes.

Using the "Global Map" format of this option generates an output which lists all cross-references for the file selected, global location of each field in the file, input templates, print templates, and sort templates, when applicable. For a comprehensive list of IVM files, please refer to the FILES section of this manual.

Glossary

This glossary contains terms and their definitions as they relate to the IVM package.

Category A veteran   A patient who, as a result of Means Testing, is in the mandatory category in regard to eligibility for VA care.

Category C veteran   A patient who, as a result of Means Testing, is in the discretionary category in regard to eligibility for VA care.

Full Data Transmission   A complete information profile transmitted to the HEC containing patient demographic, eligibility, Means Test, income, insurance, and enrollment information.

HEC   Health Eligibility Center (formerly IVM Center)

HL7   Health Level 7 is an interface specification designed to standardize the way in which health care information is transferred between systems. IVM utilizes the V*ISTA* HL7 package to assist in transporting data using this specification.

IRS   Internal Revenue Service

IVM   Income Verification Match. A program designed to verify income and insurance data reported by the veteran with that received from IRS (Internal Revenue Service), SSA (Social Security Administration), and other sources.

Means Test   Eligibility for VA hospital care and nursing home care is divided into two categories - mandatory and discretionary. An income assessment is made to determine whether a non service-connected veteran, who is not in receipt of VA monetary benefits or otherwise exempt from income assessment, is eligible for cost-free VA medical care. This income assessment is known as "Means Testing". Patients whose income is above the defined income levels must agree to make copayments to VA for outpatient and inpatient care rendered.

SSA   Social Security Administration

Suggested SSN   Patient or spouse SSNs returned from SSA as possible matches based on name, sex, and date of birth. These SSNs will be validated by the HEC before being returned to the field facilities.

Third Party Claim   When a party other than the patient, such as an insurance company, is billed.

Appendix A - IVM Data Transmissions

Basic knowledge of the HL7 protocol is assumed and the information contained in the HL7 protocol will not be repeated *here*. Further information concerning the HL7 protocol may be found in the HL7 Interface Standards *V.* 2.1.

1. *Purpose*

This document specifies the purpose of the interface between the **V**_IST_**A** IVM package and the HEC (non-**V**_IST_**A**) system based on the HL7 protocol. It is intended that this interface form the basis for exchange of healthcare information between the **V**_IST_**A** IVM package and the HEC system.

2. *Scope*

This document describes the messages that are exchanged between the **V**_IST_**A** IVM package and the HEC (non-**V**_IST_**A**) system for the purpose of exchanging income test, demographic, insurance, and enrollment information.

3. *General*

This application uses the abstract message approach and encoding rules specified by HL7. HL7 is used for communicating data associated with various events that occur in healthcare environments. For example, when a Means Test is added in **V**_IST_**A**, the event will trigger a Full Data Transmission message to the HEC.

4. *Communications Protocol*

HL7 V. 1.5 of the VA MailMan lower level protocol (LLP) will be used to transmit HL7 messages between the local site and the HEC.

5. *Background Messages*

On a daily basis, the data associated with various events that occur in V*IST*A will be transmitted to the HEC. The IVM Background Job option will be used to transmit a HL7 unsolicited Full Data Transmission for each V*IST*A event occurring that day.

6. Batch Messages

All HL7 unsolicited messages sent from the **V**IST**A** IVM application and received from the HEC (non-**V**IST**A**) system will be in a batch format. Each batch will contain 1-100 messages/records per batch.

7. HL7 Message Event Types

IVM V. 2.0 supports the receipt and transmission of the following HL7 message event types (data transmissions).

HL7 Transmission Name	HL7 MESSAGE TYPE	HL7 Event Code
SSN Data Transmission	ORU	Z03
Insurance Data Transmission	ORU	Z04
Follow-up Data Transmission	ORU	Z04
Demographic Data Transmission	ORU	Z05
Means Test Data Transmission	ORF/ORU	Z06
Full Data Transmission	ORF/ORU	Z07
Case Status Data Transmission	ORU	Z08
Billing/Collection Data Transmission	ORU	Z09
Income Test Data Transmission	ORU/ORF	Z10
Enrollment/Eligibility Data Transmission	ORF/ORU	Z11
VIST**A** – Initiated Enrollment/Eligibility Query Transmission	QRY	QRY
IVM – Initiated Query Transmission	QRY	QRY

NOTE: The transmission of the Initial Data Transmission (ORU~Z01) and the Full Data Transmission (ORU/ORF~Z02) type messages are no longer supported.

8. HL7 Message Segments

IVM V.2.0 utilizes the following HL7 segments to support the exchange of patient data.

Segment ID	Segment Name
FT1	Financial Segment
IN1	Insurance Segment
NTE	Notes And Comments Segment
OBX	Observation/Result Segment
PID	Patient Identification Segment
QRD	Query Definition Segment
QRF	Query Filter Segment
ZBT	VA-Specific Beneficiary Travel Segment
ZCD	VA-Specific Catastrophic Disability Segment
ZCT	VA-Specific Emergency Contact Segment
ZDP	VA-Specific Patient Dependent Information Segment
ZEL	VA-Specific Patient Eligibility Segment
ZEM	VA-Specific Employment Information Segment
ZEN	VA-Specific Enrollment Segment
ZFE	VA-Specific Fee Basis Segment
ZGD	VA-Specific Guardian Segment
ZIC	VA-Specific Income Segment
ZIE	VA-Specific Patient Ineligible Segment
ZIO	VA-Specific Inpatient/Outpatient Information Segment
ZIR	VA-Specific Income Relation Segment
ZIV	VA-Specific Message Processing Segment
ZMT	VA-Specific Means Test/Copay Test Information Segment
ZPD	VA-Specific Patient Information Segment
ZRD	VA-Specific Rated Disabilities Segment
ZSP	VA-Specific Service Period Segment
ZTA	VA-Specific Temporary Address Segment

9. HL7 Message Definitions

In this section, the following elements will be defined for each HL7 message.

- ➢ Message Type
- ➢ Message Event Code
- ➢ Abstract Message Syntax (list of segments used in the message)
- ➢ List of Data Fields (sequence numbers used for each segment)

An HL7 message is composed of individual HL7 segments. Each individual segment contains logical groupings of data. The Braces { } indicate one or more repetitions of the enclosed group of segments. The Brackets [ ] indicate that a segment may be optional. For each message, there will be a list of HL7 standard segments or VA-specific "Z" segments used in the message. The data fields (represented by sequence numbers) utilized in each segment will also be specified. The HL7 Transmission/Event Type Codes are annotated beside each message type.

Please note that an ORF transmission contains the MSA and QRD segments, but the ORU transmission does not.

SSN Data Transmission - (ORU~Z03)
The SSN data transmission transmits new veteran or spouse social security numbers to your
facility from the HEC.

```
BHS     Batch Header Segment
{MSH            Message Header
PID             Patient Identification Segment (SEQ 1,3,5,7,19)
ZIV             VA-Specific Message Processing Segment (SEQ 1-7,12)
}
BTS     Batch Trailer
```

Insurance Data Transmission - (ORU~Z04)

The insurance data transmission transmits patient insurance information to your facility from
HEC.

```
BHS     Batch Header
{MSH            message header
PID             Patient Information Segment (SEQ 1,3,5,7,19)
IN1             Insurance Segment (SEQ 1,4-5,7-9,12-13,15-17,28,36)
ZIV             VA-Specific Message Processing Segment (SEQ 1,9,12)
}
BTS     Batch Trailer
```

Follow-up insurance data transmissions are transmitted from your facility to alert the HEC as to
the action taken regarding insurance information acceptance or rejection. The format for the
responding transmission follows (message will NOT be batched).

```
MSH     Message Header
PID             Patient Identification Segment (SEQ 1,3,5,7,19)
IN1             Insurance Segment (SEQ 1,4,36)
ZIV             VA-Specific Message Processing Segment (SEQ 1,9-11)
```

Demographic Data Transmission - (ORU~Z05)

```
BHS     Batch Header
{MSH            Message Header
PID             Patient Identification Segment (SEQ 1,3,5,7-8,11-13,19)
ZPD             VA-Specific Patient Info Segment (SEQ 1,9,13)
ZGD             VA-Specific Guardian Segment (SEQ 1-8)
}
BTS     Batch Trailer
```

Means Test Data Transmission – (ORF~Z06)
The means test data transmission returns an observation of the means test signature in response to the site's transmission of a means test image.

```
BHS     Batch Header
{MSH    Message Header
PID              Patient Identification Segment (SEQ 1,3,19)
}
ZMT              VA-Specific Means Test Info Segment (SEQ 1-5,7-12,15,17-21)
}
BTS     Batch Trailer
```

Means Test Data Transmission - (ORU~Z06)
The means test data transmission transmits the IVM-verified means test from the HEC to your facility.

```
BHS     Batch Header
{MSH    Message Header
PID              Patient Identification Segment (SEQ 1,3,19)
ZIC              VA-Specific Income Segment (SEQ 1-20)
ZIR              VA-Specific Income Relation Segment (SEQ 1-5,10)
{ZDP             VA-Specific Dependent Info Segment (SEQ 1-9 for spouse and SEQ 1-7,9 for all
                     other dependents)
ZIC              VA-Specific Income Segment (SEQ 1-12,16-20 for spouse and SEQ 1-12,15 for all
                     other dependents)
ZIR              VA-Specific Income Relation Segment (SEQ 1 for spouse and SEQ 1,3,6-9 for all
                     other dependents)
}
ZMT              VA-Specific Means Test Info Segment (SEQ 1-5,7-12,15,17-21)
}
BTS     Batch Trailer
```

Case Status Data Transmission - (ORU~Z08)
The case status data transmission is generated by the HEC to alert your facility of closed cases.

```
BHS     Batch Trailer
{MSH    Message Header
PID              Patient Identification Segment (SEQ 1,3,5,7,19)
ZIV              VA-Specific Message Processing Segment (SEQ 1,2,8)
}
BTS     batch trailer
```

Billing/Collection Data Transmission - (ORU~Z09)

the billing/collection data transmission transmits IVM-related billing and collections information to the HEC.

```
BHS     Batch Header
{MSH   Message Header
PID             Patient Identification Segment (SEQ 1,3,5,7,19)
FT1             Financial Transaction (SEQ 1,4,6-7,9,11)
}
ZIC             VA-Specific Income Segment (SEQ 1-2)
}
BTS     Batch Trailer
```

Full Data Transmission - (ORU~Z07)

The Full Data Transmission transmits a complete profile of patient demographic, eligibility, Means Test, income, insurance, and enrollment information to the HEC.

```
BHS     Batch Header
{MSH   Message Header
 PID             Patient Identification Segment (SEQ 1,3,5,7-8,11-14,19)
 ZPD             VA-Specific Patient Info Segment (SEQ 1,8-9,11-13,17,19)
 ZTA             VA-Specific Temporary Address Segment (SEQ 1-7)
 ZIE             VA-Specific Patient Ineligible Segment (SEQ 1-3)
{ZEL             VA-Specific Patient Eligibility Segment (SEQ 1-2,5-8,10-11,13-21 for primary
                    eligibility and SEQ 1-2 for all other eligibilities; SEQ 23-25 for MST Status)
}
 ZEN             VA-Specific Enrollment Segment (SEQ 1-13)
 ZCD             VA-Specific Catastrophic Disability Segment (SEQ 1-5)
{ZRD             VA-Specific Rated Disabilities Segment (SEQ 1-4)
}
 ZCT             VA-Specific Emergency Contact Segment (SEQ 1-7)
{ZEM             VA-Specific Employment Info Segment (SEQ 1-3)
}
{ZGD             VA-Specific Guardian Segment (SEQ 1-8)
 }
 ZIC             VA-Specific Income Segment (SEQ 1-21)
 ZIR             VA-Specific Income Relation Segment (SEQ 1-5,10)
{ZDP             VA-Specific Dependent Information Segment (SEQ 1-9 for spouse and SEQ 1-7,9
                    for all other dependents)
 ZIC             VA-Specific Income Segment (SEQ 1-12,16-20 for spouse and SEQ 1-12,15 for all
                    other dependents)
 ZIR             VA-Specific Income Relation Segment (SEQ 1 for spouse and SEQ 1,3,6-9 for all
                    other dependents)
}
 ZIO             VA-Specific Patient Info Segment (SEQ 1-4)
{NTE             Notes & Comments (SEQ 1,3)
 }
{IN1             Insurance Segment (SEQ 1,4-5,7-9,12-13,15-17,28,36)
 }
 ZMT             VA-Specific Means Test Information Segment (SEQ 1-18)
 ZMT             VA-Specific CoPay Test Information Segment (SEQ 1-4,9,12,15-18)
 ZBT             VA-Specific Beneficiary Travel Information Segment (SEQ 1-4,7)
```

Full Data Transmission - (ORU~Z07), (continued)

DGRPEIS2	LOGDCD^IVMCUC	YES	Routine hook will monitor changes to the fields contained on Screen #9 (Income Screening Data) of the Registration module**.**

Appendix B - HL7 Segment Table Definitions

For each HL7 segment, the data elements contained in the segment are described in table format. These tables are described in the following sections. The abbreviated column headings contained in the tables and associated HL7 data types are also defined.

HL7 Abbreviated Column Headings

Column Heading	Definition
SEQ	Sequence of data element in segment
LEN	Maximum length of data element
DT	Data Type
R/O	Required/Optional (R = Required, blank = Optional)
RP/#	Repeats/Maximum number of repetitions (Y for repeats)
TBL#	Number of corresponding HL7 user defined/supported table

HL7 Data Types

Data Type (DT)	Definition	VA FileMan Data Type
AD	Address	Free Text
CE	Coded Element	Set of Codes or Pointer
CK	Check Digit	No Equivalent
CM	Composite	No Equivalent
DT	Date	Date Only
ID	Coded Value	Set of Codes or Pointer
IS	Coded Value for user-defined tables	Set of Codes or Pointer
NM	Numeric	Numeric
PN	Person Name	Free Text
TM	Time	Time Only
TN	Telephone Number	Free Text
TS	Time Stamp	Date/Time
TX	Text	Word processing
SI	Sequence ID	Numeric
ST	String	Free Text

HL7 Segment Tables

Insurance Segment (IN1)

SEQ	LEN	DT	R/O	RP/#	TBL #	Element Name	VISTA Element Name VISTA File Field or Expression
1	4	SI	R			Set ID-Insurance	Sequential number.
2	8	ID				Insurance Plan ID	Not used at this time.

27	1	IS			VA0051	***Means Test Signature Indicator	MEANS TEST SIGNED? Filed (#.29)

Notes:
* Deletion of a Test: SEQ 1 indicates the type of test to delete.
     SEQ 2 will be used to indicate which income year test to delete. The income year is the year prior to the date of the means test.
     SEQ 3 = HLQ will indicate that the test should be deleted.
** Deletion of a Hardship Determination:
     SEQ 24 = HLQ will indicate that the hardship determination should be deleted.
     SEQ 2 will be used to indicate for which income year to delete the hardship determination . The income year is the year prior to the date of the means test.
*** Means Test Signature Indicator
     SEQ 27 was added by Patch IVMB*2*600 for the Implement Signed Means Test Strategy project. VAMCs receive and store data from SEQ 27, but do not include this sequence in transmissions to the HEC. VAMCs send means test signature images to the HEC via FAX. HEC staff processes those images using commercial software with updates to the HEC database via custom remote procedure calls (RPCs).

VA-Specific Patient Information Segment (ZPD)

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	VISTA Element Name PATIENT (#2) File Field or Expression

VA-Specific Rated Disabilities Segment (ZRD)

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	V*IST*A Element Name PATIENT (#2.3721) Sub-File Field or Expression
1	4	SI	R			Set ID	Sequential Number
2	4	CE				Disability Condition *(See below.)	RATED DISABILITIES (VA) field (#.01)
3	3	NM				Disability %	DISABILITY % field (#2)
4	1	IS			VA01	Service Connected Rated Disability	SERVICE CONNECTED field (#3)

* DISABILITY CONDITION has the coded element data type, which is one of the composite data types. The '~' is always used within the IVM and Enrollment packages as the component separator. The general format for the coded element data type, from the 2.3 version of the HL7 standard, is:

```
<identifier (ST)>~<text (ST)>~<name of coding system (ST)>~<alternate identifier (ST)~
```

The actual format for the DISABILITY CONDITION is:

```
<4-digit DX CODE from the Disability Condition file (#31)>~<45 character NAME field from the
Disability Condition file>
```

If the DISABILITY CONDITION field is included in the segment than both of its components are required.

Here is an example of the ZRD segment: **ZRD^1^5001~BONE DISEASE^30^1**

Batch Header Segment (BHS), continued

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	V*IST*A Description
9	20	ST				Batch Name/ID/Type	4 Components: Component 1: Batch Name (Not used) Component 2: Processing ID Component 3: Message Type Component 4: Version ID *These 4 components must be separated by the HL7 component separator. The processing ID, message type, and version ID correspond to fields of the same name in the MSH segment*
10	80	ST				Batch Comment	2 Components: Component 1: *Refer to Table 0008* Component 2: Text Message
11	20	ST				Batch Control ID	Automatically generated by **V***IST***A** HL7 Package
12	20	ST				Reference Batch Control ID	Batch Control ID of batch message being acknowledged

Batch Trailer Segment (BTS)

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	V*IST*A Description
1	10	ST				Batch Message Count	Number of messages within the batch message
2	80	ST				Batch Comment	Not used at this time
3	100	CM		Y		Batch Totals	Not used at this time

Message Header Segment (MSH)

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	V*IST*A Description
1	1	ST	R			Field Separator	Recommended value is ^ (caret)
2	4	ST	R			Encoding Characters	Recommended delimiter values: Component = ~ (tilde) Repeat = | (bar) Escape = \ (back slash) Subcomponent = **&** (ampersand)

3	15	ST				Sending Application	When originating from facility:
							   IVM
							When originating from HEC:
							   IVM CENTER

4	20	ST				Sending Facility	When originating from facility:
							   Station's facility number
							When originating from HEC:
							   724

5	30	ST				Receiving Application	When originating from facility:
							   IVM CENTER
							When originating from HEC:
							   IVM

Message Header Segment (MSH) , continued

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	VISTA Description
6	30	ST				Receiving Facility	When originating from facility: **724** When originating from HEC: **Station's facility number**
7	26	TS				Date/Time of Message	Date and time message was created
8	40	ST				Security	Not used
9	7	CM	R		0076	Message Type	2 Components: Component 1: *Refer to Table 0076* Component 2: *Message Event Type Code*
10	20	ST	R			Message Control ID	Automatically generated by **V**IST**A** HL7 Package
11	1	ID	R		0103	Processing ID	**P** (Production)
12	8	ID	R		0104	Version ID	**2.1** (Version 2.1)
13	15	NM				Sequence Number	Not used at this time
14	180	ST				Continuation Pointer	Not used at this time
15	2	ID			0155	Accept Acknowledgment Type	Not used at this time
16	2	ID			0155	Application Acknowledgment Type	Not used at this time
17	2	ID				Country Code	Not used at this time

Message Acknowledgment Segment (MSA)

SEQ	LEN	DT	R/O	RP/#	TBL#	Element Name	VISTA Description
1	2	ID	R		0008	Acknowledgment Code	*Refer to Table 0008*
2	20	ST	R			Message Control ID	Message Control ID of message being acknowledged
3	80	ST				Text Message	Error text denoting why the message was rejected
4	15	NM				Expected Sequence Number	Not used
5	1	ID			0102	Delayed Acknowledgment Type	Not used
6	100	CE				Error Condition	Not used

Supported/User-Defined HL7 Tables

Table 0001 - Sex

Value	Description
F	FEMALE
M	MALE
O	OTHER
U	UNKNOWN

Table 0002 - Marital Status

Value	Description
A	SEPARATED
D	DIVORCED
M	MARRIED
S	SINGLE
W	WIDOWED

Table 0008 Acknowledgment code

Value	Description
AA	Original Mode: Application Accept Enhanced Mode: Application Acknowledgment: Accept
AE	Original Mode: Application Error Enhanced Mode: Application Acknowledgment: Error
AR	Original Mode: Application Reject Enhanced Mode: Application Acknowledgment: Reject
CA	Enhanced Mode: Accept Acknowledgment: Commit Accept
CE	Enhanced Mode: Accept Acknowledgment: Commit Error
CR	Enhanced Mode: Accept Acknowledgment: Commit Reject

Table 0076 - Message Type

Value	Description
ADT	ADT MESSAGE
ACK	GENERAL ACKNOWLEDGMENT
ORF	OBSERV. RESULT/RECORD RESPONSE
ORU	OBSERV RESULT/UNSOLICITED
QRY	QUERY

Note: This is not the complete table. It contains those message types used by the VISTA/HEC interface.

Table 0103 - Processing ID

Value	Description
D	DEBUGGING
P	PRODUCTION
T	TRAINING

Table 0104 - Version ID

Value	Description
2.0	RELEASE 2.0
2.0D	DEMO 2.0
2.1	RELEASE 2.1
2.2	RELEASE 2.2

Table VA0051 Means Test Signature Status

Value	Description
1	YES; Means Test image received and signed
0	NO; Means Test image received, but unsigned
9	DELETED; Means Test signature indicator has been deleted

Table VA0052 – NTR Verification Method

Value	Description
S	Qual Military Srvc (Qualifying Military Service)
M	Military Med Rec (Military Medical Record)
N	Not Qualified

Table VA0053 – NTR Qualifiers

Value	Description
1	Received NTR Trmt (Received NTR Treatment)
2	Aviator Pre 1955 (Aviator Prior to 1955)
3	Sub Trainee pre 1965 (Navy Sub Trainee Prior 1965)
4	Dx With Head Neck Cancer (Diagnosed With Head and Neck Cancer)
5	No NTR Trmt (No NTR Treatment)
6	Not Aviator Pre 1955 (Not Aviator Prior to 1955)
7	Not Sub Trainee pre 1965 (Not Navy Sub Trainee Prior 1965)
8	Not Dx With Head Neck Cancer (Not Diagnosed With Head and Neck Cancer)
9	NTR Trmt Unknown (NTR Treatment Unknown)

Table VA01 - Yes/No

Value	Description
0	NO
1	YES

Table VA02 - Current Means Test Status
CODE (#.02) field of MEANS TEST STATUS (#408.32) file

Value	Description
A	CATEGORY A
B	CATEGORY B
C	CATEGORY C
E	EXEMPT
I	INCOMPLETE
L	NO LONGER APPLICABLE
M	NON-EXEMPT
N	NO LONGER REQUIRED
P	PENDING ADJUDICATION
R	REQUIRED

Table VA03 - Employment Status
EMPLOYMENT STATUS (#.31115) field of PATIENT (#2) file

Value	Description
1	EMPLOYED FULL TIME
2	EMPLOYED PART TIME
3	NOT EMPLOYED
4	SELF EMPLOYED
5	RETIRED
6	ACTIVE MILITARY DUTY
9	UNKNOWN

Table VA04 - Eligibility
Internal Entry Number of MAS ELIGIBILITY CODE (#8.1) file

Value	Description
1	SERVICE CONNECTED 50% to 100%
2	AID & ATTENDANCE
3	SC LESS THAN 50%
4	NSC - VA PENSION
5	NSC
6	OTHER FEDERAL AGENCY
7	ALLIED VETERAN
8	HUMANITARIAN EMERGENCY
9	SHARING AGREEMENT
10	REIMBURSABLE INSURANCE
12	CHAMPVA
13	COLLATERAL OF VET.
14	EMPLOYEE
15	HOUSEBOUND
16	MEXICAN BORDER WAR
17	WORLD WAR I
18	PRISONER OF WAR
19	TRICARE/CHAMPUS
20	MEDICARE
21	CATASTROPHICALLY DISABLED

Table VA05 - Disability Retirement From Military
DISABILITY RET. FROM MILITARY? (#.362) field of PATIENT (#2) file

Value	Description
0	NO
1	YES, RECEIVING MILITARY RETIREMENT
2	YES, RECEIVING MILITARY RETIREMENT IN LIEU OF VA COMPENSATION
3	UNKNOWN

Table VA06 - Eligibility Status
ELIGIBILITY STATUS (#.3611) field of PATIENT (#2) file

Value	Description
P	PENDING VERIFICATION
R	PENDING RE-VERIFICATION
V	VERIFIED

Table VA07 - Race
ABBREVIATION (#2) field of RACE (#10) file

Value	Description
1	HISPANIC, WHITE
2	HISPANIC, BLACK
3	AMERICAN INDIAN OR ALASKA NATIVE
4	BLACK, NOT OF HISPANIC ORIGIN
5	ASIAN OR PACIFIC ISLANDER
6	WHITE, NOT OF HISPANIC ORIGIN
7	UNKNOWN

Table VA08 - Religion
CODE (#3) field of RELIGION (#13) file

Value	Description
0	CATHOLIC
1	JEWISH
2	EASTERN ORTHODOX
3	BAPTIST
4	METHODIST
5	LUTHERAN
6	PRESBYTERIAN
7	UNITED CHURCH OF CHRIST
8	EPISCOPALIAN
9	ADVENTIST
10	ASSEMBLY OF GOD
11	BRETHREN
12	CHRISTIAN SCIENTIST

18	JEHOVAH'S WITNESS
19	LATTER-DAY SAINTS
20	ISLAM
21	NAZARENE
22	OTHER
23	PENTECOSTAL
24	PROTESTANT, OTHER
25	PROTESTANT, NO PREFERENCE
26	REFORMED
27	SALVATION ARMY
28	UNITARIAN; UNIVERSALIST
29	UNKNOWN/NO PREFERENCE

Table VA09 - Relationship Number
RELATIONSHIP NUMBER (#.001) field [internal entry number] of RELATIONSHIP
(#408.11) file

Value	Description
1	SELF
2	SPOUSE
3	SON
4	DAUGHTER
5	STEPSON
6	STEPDAUGHTER
7	FOSTER SON
8	FOSTER DAUGHTER
9	SON-IN-LAW
10	DAUGHTER-IN-LAW
11	BROTHER
12	SISTER
13	STEPBROTHER
14	STEPSISTER
15	BROTHER-IN-LAW
16	SISTER-IN-LAW
17	FATHER
18	MOTHER
19	STEPFATHER
20	STEPMOTHER
21	FATHER-IN-LAW
22	MOTHER-IN-LAW
23	GRANDFATHER
24	GRANDMOTHER
25	GREAT-GRANDFATHER
26	GREAT-GRANDMOTHER
27	GRANDSON
28	GRANDDAUGHTER
29	GREAT-GRANDSON
30	GREAT-GRANDDAUGHTER

Table VA09 - Relationship Number, continued

Value	Description
31	NEPHEW
32	NIECE
33	UNCLE
34	AUNT
99	OTHER

Table VA11 - Period of Service
Internal Entry Number of PERIOD OF SERVICE (#21) file

Value	Description
0	KOREAN
1	WORLD WAR I
2	WORLD WAR II
3	SPANISH AMERICAN
4	PRE-KOREAN
5	POST-KOREAN
6	OPERATION DESERT SHIELD
7	VIETNAM ERA
8	POST-VIETNAM
9	OTHER OR NONE
A	ARMY—ACTIVE DUTY
B	NAVY, MARINE—ACTIVE DUTY
C	AIR FORCE—ACTIVE DUTY
D	COAST GUARD—ACTIVE DUTY
E	RETIRED, UNIFORMED FORCES
F	MEDICAL REMEDIAL ENLIST
G	MERCHANT SEAMEN—USPHS
H	OTHER USPHS BENEFICIARIES
I	OBSERVATION/EXAMINATION
J	OFFICE OF WORKERS COMP
K	JOB CORPS/PEACE CORPS
L	RAILROAD RETIREMENT
M	BENEFICIARIES-FOREIGN GOV
N	HUMANITARIAN (NON-VET)
O	CHAMPUS RESTORE
P	OTHER REIMBURS. (NON-VET)
Q	OTHER FEDERAL – DEPENDENT
R	DONORS (NON-VET)
S	SPECIAL STUDIES (NON-VET)
T	OTHER NON-VETERANS
U	CHAMPVA—SPOUSE, CHILD
V	CHAMPUS
W	CZECHOSLOVAKIA/POLAND SVC
X	PERSIAN GULF WAR
Y	CAV/NPS
Z	MERCHANT MARINE

Table VA13 - Rated Disabilities
NUMBER (.001) Field [internal entry number] of the DISABILITY CONDITION (#31) File
(Sample listing of possible values)

Value	Description
1	OSTEOMYELITIS
2	BONE DISEASE
3	RHEUMATOID ARTHRITIS
4	DEGENERATIVE ARTHRITIS
5	ARTHRITIS

Table VA14 - Medication Copayment Exemption Status

Value	Description
0	NON-EXEMPT
1	EXEMPT

Table VA15 - Enrollment Status
(#.04) field of the PATIENT ENROLLMENT (#27.11) file

Value	Description
1	Unverified
2	Verified
3	Inactive (not used at this time)
4	Rejected (not used at this time)
5	Suspended (not used at this time)
6	Deceased
7	Canceled/Declined
8	Expired (not used at this time)
9	Pending (not used at this time)
10	Not Eligible
11	Rejected; Fiscal Year
12	Rejected; Mid-cycle
13	Rejected; Stop New Enrollments
14	Rejected; Initial Application by VAMC
15	Pending; No Eligibility Code in VIVA
16	Pending; Means Test Required
17	Pending; Eligibility Status is Unverified
18	Pending; Other
19	Not Eligible; Refused to Pay Copay
20	Not Eligible; Ineligible Date
21	Pending; Purple Heart Unconfirmed
22	Rejected; Below Enrollment Group Threshold

Table VA16 - Reason Enrollment Canceled/Declined
(#.05) field of the PATIENT ENROLLMENT (#27.11) file

Value	Description
1	Dissatisfied with Care
2	Geographic Access
3	Other Insurance
4	Other

Table VA17 - Enrollment Priority
(#.07) field of the PATIENT ENROLLMENT (#27.11) file

Value	Description
1	Priority 1
2	Priority 2
3	Priority 3
4	Priority 4
5	Priority 5
6	Priority 6
7	Priority 7

Table VA0115 - Servicing Facility
(Sample listing of possible values)

Value	Description
512 9AC	Perry Point (Nursing Home)

Table VA0033 – Fee Basis Treatment Code Type

Value
Short Term Fee Status
Home Nursing Services
For I.D. Card Status
State Home

Table VA0034 – Fee Basis Program

Value
CHAMPVA
Civil Hospital
Comp & Pension
Contract Halfway House
Contract Nursing Home
Contract Readjustment Counseling
Dental
Dialysis
Home Health Services
Inpatient
Other Institutional Services
Outpatient
Oxygen Services
Pharmacy
State Home

Table VA0035 – Enrollment Sub-Group
Enrollment Sub-Group (.12) of Patient Enrollment file (#27.11)

Value	Description
a	Non-compensable zero percent service connected veterans who were in an enrolled status on a specified date and who have remained continuously enrolled thereafter
b	Non-compensable zero percent service-connected veterans not included in "a" above
c	Non-service connected veterans who were in an enrolled status on a specified date and who have remained continuously enrolled thereafter
d	Non-service connected veterans not included in "c" above
